

**TEXAS WATER DEVELOPMENT BOARD
RESEARCH AND PLANNING FUND
SENATE BILL ONE
REGIONAL WATER PLANNING
REGION H REGIONAL WATER
PLANNING GRANT APPLICATION**

April 8, 2011

San Jacinto River Authority

I. GENERAL INFORMATION

1. Legal name of applicant(s).

San Jacinto River Authority

2. Regional Water Planning Group:

Region H Water Planning Group

3. Authority of law under which the applicant was created.

The San Jacinto River Authority was created in accordance with Texas Revised Civil Statutes Annotated Article 8280-212.

4. Applicant's official representative, Name, Title, Mailing address, Phone number, Fax number, if available, E-mail Address, and Vendor ID Number.

*Reed Eichelberger, P.E.
General Manager
San Jacinto River Authority
P.O. Box 329
Conroe, Texas 77305-0329
Phone No: (936) 588-7111
Fax No: (936) 588-3043
E-mail: reed@sjra.net
Vendor ID No: TIN 746000561*

5. DUNS Number, if you do not have a DUNS number, visit:

https://eupdate.dnb.com/requestoptions.asp?cm_re=HomepageB*DUNSNumberTab

Not Applicable

6. Central Contract Registration Number (CCR#). If you do not have a CCR number, visit:

<https://www.uscontractorregistration.com/>

Not Applicable

7. Is this application in response to a Request for Applications published in the Texas Register?

Yes No

8. If yes to No. 6 above, list document number and date of publication of the Texas Register.

Texas Register Document No. TRD-201100237, published February 4, 2011

9. Type of proposed planning (Check all that apply)

Initial scope of work
Development of a regional water plan X
Revision of a regional water plan
Special studies approved by TWDB

10. Total proposed planning cost (see Guidance for Preparation of Application at <http://www.twdb.state.tx.us/wrpi/rwp/docu.asp> for amount)

Total Proposed Planning Cost \$527,018

11. Total grant funds requested from the Texas Water Development Board.

Total Proposed Grant Funds \$527,018

12. Detailed statement of the purpose for which the money will be used. (Not to exceed 1 page.)

Funds are requested to complete the initial scope of work for the Fourth Cycle of Regional Water Planning (see Attachment A).

13. Detailed description of why state funding assistance is needed. (Not to exceed 1 page.)

Regional Water Planning Groups are not political subdivisions and therefore have no means of raising funds for the preparation of Regional Water Plans other than accepting contributions. The need for state funding is identified in 31 TAC 355, Subchapter C, relating to Regional Water Planning Groups.

14. Identify potential sources and amounts of funding available for implementation of viable solutions resulting from proposed planning.

Twenty-five Wholesale Water Providers were identified in the current Regional Water Plan. Each is pursuing appropriate water management strategies within their service areas and will address the funding required for each as they are implemented.

II. PLANNING INFORMATION

15. A detailed scope of work for proposed planning.

The major scope items proposed for this planning process are listed below. A detailed scope of work is provided as Attachments A.

TASK 2A – Non-Population Related Water Demand Projections

TASK 2B – Population and Population-Related Water Demand Projections

TASK 3 – Water Supply Analyses

TASK 4B – Identification of Potentially Feasible Water Management Strategies

TASK 4C – Prepare and Submit Technical Memorandum

TASK 4D – Evaluate and Recommend Water Management Strategies

TASK 10 – Public Participation and Plan Adoption

The scope of work provided in Attachment A was prepared by the Texas Water Development Board (TWDB) and provided to the Region H Water Planning Group for use in developing this grant application. The purpose of this initial scope of work and this grant application is to initiate the planning and development of the 2016 Region H Regional Water Plan. It is expected by the TWDB and the Region H Water Planning Group that additional funding will be made available by the 82nd Texas Legislature to complete the 2016 Region H Regional Water Plan and that additional planning grants will be proposed and authorized to fulfill the requirements of regional planning.

17. A task budget for detailed scope of work by task.

See Attachment B.

18. An expense budget for detailed scope of work by expense category.

See Attachment C.

19. A time schedule for completing detailed Scope of Work by task.

See Attachment D.

20. Specific deliverables for each task in Scope of Work.

Deliverables for the scope items are presented in the scope of work provided in Attachment A.

21. Method of monitoring study progress.

Progress reports submitted to the TWDB, Regional Water Planning Group, and the San Jacinto River Authority.

22. Qualifications and direct experience of proposed project staff.

See Attachment E.

III. WRITTEN ASSURANCES

Written assurance of the following items:

Proposed planning does not duplicate existing projects;

The proposed planning to be completed as part of this regional water planning grant does not duplicate existing projects.

Implementation of viable solutions identified through the proposed planning will be diligently pursued and identification of potential sources of funding for implementation of viable solutions;

The Wholesale Water Providers identified in the current Regional Water Plan have begun the preliminary studies and implementation steps for the near-term water management strategies and it is expected that the wholesale water providers identified in this 4th Cycle of Regional Water Planning will implement those strategies that fall within their service areas. Funding for these strategies will be determined on a case-by-case basis by the appropriate political subdivision.

IV. PROOF OF NOTIFICATION

Proof of notification

Develop or revise regional water plans. Eligible applicants requesting funds to develop or revise regional water plans must, not less than 30 days before board consideration of the application, provide notice that an application for planning assistance is being filed with the executive administrator by:

- (1) publishing notice once in a newspaper of general circulation in each county located in whole or in part in the regional water planning area; and
- (2) mailing notice to each mayor of a municipality with a population of 1,000 or more or which is a county seat and that is located in whole or in part in the regional water planning area, to each county judge of a county located in whole or in part in the regional water planning area, to all districts and authorities created under Texas Constitution, Article III, §52, or Article XVI, §59, located in whole or in part in the regional water planning area based upon lists of such water districts and river authorities obtained from Texas Commission on Environmental Quality, and all regional water planning groups in the state.

The notice must include the following:

- Name and address of applicant and applicant's official representative;
- Brief description of proposed planning area;
- Purpose of the proposed planning;
- Texas Water Development Board Interim Executive Administrator's name (Melanie Callahan) and address; and
- Statement that any comments on the proposed planning must be filed with the applicant and the Texas Water Development Board Interim Executive Administrator within 30 days of the date on which the notice was mailed.

The Region H Planning Group has complied with this request. Information regarding the notices can be found in Attachment F.

ATTACHMENT A

SCOPE OF WORK

DRAFT

Initial Scope of Work for the Fourth Cycle of Regional Water Planning

February 4, 2011

Note that there is no separate task or associated budget for the preparation of scope of work for the initial phase of the planning activities.

TASK 1 - PLANNING AREA DESCRIPTION

(to be scoped, budgeted and incorporated by amendment into the contract at later date)

Table 1: Estimated Minimum Count of Water User Groups (WUGs) and Wholesale Water Providers (WWPs) that Must be Planned for in the 2016 Regional Water Plans¹

Region	Municipal and County-other WUGs	WWPs	Non population-related WUGs	WUGs with needs
A	71	7	95	28
B	44	2	49	12
C	357	37	97	349
D	211	16	108	48
E	25	3	24	12
F	97	7	137	62
G	308	19	187	128
H	337	24	130	330
I	182	16	108	76
J	24	1	32	2
K	129	2	102	92
L	212	7	145	124
M	87	24	47	80
N	58	4	55	21
O	87	3	102	71
P	15	1	23	3

¹Estimate based on 2011 Regional Water Plans; does not include new WUGs or WWPs and does not take into account changed conditions that must be addressed in the 2016 Regional Water Plans.

TASK 2A - NON-POPULATION RELATED WATER DEMAND PROJECTIONS²

Texas Water Development Board (TWDB) staff, in conjunction with the Texas Commission on Environmental Quality (TCEQ), Texas Parks and Wildlife Department (TPWD), and Texas Department of Agriculture (TDA) will prepare draft water demand projections for all water demands unrelated to population (e.g. mining, manufacturing, irrigation, steam electric power, and livestock) with specific attention to updated mining water demand projections to be provided by the TWDB. TWDB staff will update water demand projections for all associated Water User Groups (WUGs) and provide them to RWPGs for their review and input. All projections will be extended through 2070.

RWPGs will then review the draft projections and may provide input to TWDB or request specific changes to the projections from TWDB. If adequate justification is provided by the RWPGs to TWDB, water demand projections may be revised by the TWDB. Once RWPG input and revision requests are considered, final water demand projections will be adopted by the TWDB's governing board. The adopted projections will then be provided to RWPGs. RWPGs must use the Board-adopted projections when preparing their regional water plans.

TWDB will directly populate the online planning database with all WUG-level projections and make related changes to the online planning database if revisions are made.

This Task includes, but is not limited to, performing all work in accordance with TWDB rules and guidance required to:

1. Receive and make publicly available the draft water demand projections provided by TWDB.
2. Evaluate draft water demand projections provided by TWDB.
3. Provide detailed feedback to TWDB on water demand projections, as necessary, including justification and documentation supporting suggested changes.
4. Review comments received by local entities and the public for compliance with TWDB requirements and incorporate changes which meet TWDB conditions for changes into revision requests to TWDB.

² Additional guidance included in the *General Guidelines for Regional Water Plan Development* document.

5. Prepare and submit numerical requests for revisions, in table format in accordance with TWDB guidance, of draft water demand projections, and process such requests based on, for example, requests from local entities within the region. The RWPG and/or local entities may provide required documentation and justification of requested revisions.
6. Communicate and/or meet with TWDB staff and/or local entities requesting revisions, as necessary.
7. Assist TWDB, as necessary, in resolving final allocations of water demands to water user groups to conform with any control totals defined by TWDB, for example, by county and/or region.
8. Prepare water demand projection summaries for WUGs using final, adopted projections to be provided by the TWDB, as necessary.
9. Modify any associated water demand projections for Wholesale Water Providers (WWPs), as necessary based on final, adopted projections.
10. Review and confirm the accuracy of the *TWDB DB17 Non-Population Water Demand Related*³ report from the online planning database (DB17) and incorporate this planning database report into the Technical Memorandum and draft and final regional water plans (labeled as such and with source reference).
11. Modify any aggregated water demand summaries, for example, for Wholesale Water Providers (WWPs) or irrigation districts, accordingly incorporate this planning database report into the Technical Memorandum and draft and final regional water plans (labeled as such and with source reference).
12. Update WWP contractual obligations and WUG 'seller' obligations to supply water to other entities and report this information along with projected demands including within the online planning database and within any planning memorandums or reports, as appropriate.
13. Complete and update required data elements within the online planning database (DB17).⁴

³ All 'TWDB DB17...' reports are based on data entered by RWPGs into the database in accordance with the Guidelines for Regional Water Plan Data Deliverables. These reports will be provided by TWDB through the online planning database web interface as a customizable report that can be downloaded by RWPGs and must be included as part of every Technical Memorandum and water plan.

⁴ RWPG technical consultants must attend mandatory training on the online planning database.

TASK 2B - POPULATION AND POPULATION-RELATED WATER DEMAND PROJECTIONS⁵

TWDB staff, in conjunction with the TCEQ, TPWD, and TDA will prepare draft population and associated water demand projections for all population-related water user groups in the 2016 Regional Water Plan (2016RWP) using data from the recent 2010 Census. TWDB staff will update population and associated water demand projections for all Water User Groups (WUGs) and provide them to RWPGs for their review and input. All projections will be extended through 2070.

RWPGs will then review the draft projections and may provide input to TWDB or request specific changes to the projections from TWDB. If adequate justification is provided by the RWPGs to TWDB, population and/or water demand projections may be revised by the TWDB. Once RWPG input and revision requests are considered, final population and associated water demand projections will be adopted by the TWDB. The adopted projections will then be provided to RWPGs. RWPGs must use the Board-adopted projections when preparing their regional water plans.

TWDB will directly populate the online planning database with all WUG-level projections and make related changes to the online planning database if revisions are made.

This Task includes, but is not limited to, performing all work in accordance with TWDB rules and guidance required to:

1. Receive and make publicly available the draft population and associated water demand projections provided by TWDB.
2. Evaluate draft population and associated water demand projections provided by TWDB.
3. Provide detailed feedback to TWDB on both population and associated water demand projections, as necessary, including justification and documentation supporting suggested changes.
4. Review comments received by local entities and the public for compliance with TWDB requirements and incorporate changes which meet TWDB conditions for changes into revision requests to TWDB.
5. Prepare and submit numerical requests, in table format in accordance with TWDB guidance, for revisions of draft population and/or water demand projections, and process such requests based on, for example, requests from local entities within the region. The RWPG and/or local entities may provide required documentation and justification of requested revisions.

⁵ Additional guidance included in the *General Guidelines for Regional Water Plan Development* document.

6. Communicate and/or meet with TWDB staff and/or local entities requesting revisions, as necessary.
7. Assist TWDB, as necessary, in resolving final allocations of population and water demands to water user groups to conform with any control totals defined by TWDB, for example, by county and/or region.
8. Prepare population and water demand projection summaries for WUGs using final, adopted projections to be provided by the TWDB, as necessary for presentation in documents.
9. Consider and include in all appropriate planning documents the projections of population and associated water demands for any new WUGs to be provided by the TWDB.
10. Modify any associated water demand projections for WWPs, as necessary based on final, adopted projections.
11. Review and confirm the accuracy of the *TWDB DB17 Population* and associated *TWDB DB17 Non-population Water Demand* reports from the online planning database (DB17)⁶ and incorporate these planning database reports into the Technical Memorandum and draft and final regional water plans (labeled as such and with source reference).
12. Modify any aggregated water demand summaries, for example, for Wholesale Water Providers (WWPs), accordingly and present in planning documents.
13. Update WWP contractual obligations and WUG 'seller' obligations to supply water to other entities and report this information along with projected demands including within the online planning database and within any planning memorandums or reports, as appropriate.
14. Complete and update required data elements within the online planning database (DB17).⁷

⁶ RWPG technical consultants must attend mandatory training on the online planning database.

⁷ In accordance with the Guidelines for Regional Water Plan Data Deliverables. RWPG technical consultants must attend mandatory training on the online planning database.

TASK 3 WATER SUPPLY ANALYSES⁸

This task involves updating or adding: a) groundwater, surface water, reuse, and other water source availability estimates, and b) existing WUG and WWP water supplies that were included in the 2011 Regional Water Plan, in accordance with methodology described in **Section 3** of the *General Guidelines for Regional Water Plan Development* for estimating surface water, groundwater, systems, reuse, and other supplies during drought of record conditions. All water availability and water supply estimates will be extended through 2070.

This Task includes performing all work in accordance with TWDB rules and guidance required to:

I) Estimate a) Surface Water Availability and b) Existing WUG and WWP Surface Water Supplies:

1. Select hydrologic assumptions, models, and operational procedures for modeling the region's river basins and reservoirs using Texas Commission on Environmental Quality (TCEQ) Water Availability Models (WAMs) in a manner appropriate for assessment of current surface water supply and regional water planning purposes. Reservoir systems⁹ and their yields will be modeled in accordance with the *General Guidelines for Regional Water Plan Development*.
2. Obtain TWDB Executive Administrator approval of hydrologic assumptions or models and for any variations from modeling requirements in the *General Guidelines for Regional Water Plan Development*.
3. As necessary and appropriate, modify or update associated WAMs or other models to reflect recent changes to permits, transfers, legal requirements, new water rights, and/or specified operational requirements.
4. Assign available water supplies, as appropriate, to WUGs and WWPs including conducting demand analyses for WWPs.
5. Take into account Senate Bill 3 (SB3) environmental flow process recommendations and associated TCEQ rules (e.g. flows set-asides) within models and availability and existing water supply estimates; and, in locations without completed SB3 rules, other local studies or the environmental consensus criteria per Section 4.2 of the *General Guidelines for Regional Water Plan Development*.

⁸ Additional guidance included in the *General Guidelines for Regional Water Plan Development* document.

⁹ Reservoir systems must be approved by TWDB and identified as such in DB17

6. Apply the TCEQ WAMs, as modified and approved by TWDB, and/or other appropriate models to quantify firm yield for major reservoirs, reservoir systems, and firm diversion for run-of-river water rights, as determined on at least a monthly time-step basis. Reservoir firm yield will be quantified based on the most recent measured capacity and estimated capacity in year 2070.
7. Compile TCEQ Water System Data Reports¹⁰ for municipal WUGs that use surface water and identify any physical constraints limiting existing water supplies to WUGs and/or WWPs. Limitations to be considered based on delivering treated water to WUGs. Other information that the RWPGs collect, for example, survey results, may be included in the evaluation of infrastructure capacity or limitations in delivering treated water to WUGs.
8. Take into consideration the recommendations of the SB3 environmental flows process and any resulting TCEQ rules or flow set-asides.
9. Update information on WWP contractual obligations and WUG ‘seller’ obligations to supply water to other entities including within the online planning database.¹¹ Unless the RWPG considers it unlikely that a specific contract will be renewed, water supplies based on contractual agreements will be assumed to renew at the contract termination date, for example, if the contract provides for renewal or extensions. Report this information within any planning memorandums or reports, as appropriate.
10. Based on the water availability, existing infrastructure, and associated physical and legal limitations, determine the existing surface water supply available from each surface water source to each WUG and WWP (including newly identified WUGs and WWPs) during a drought of record based on source water availability, infrastructure capacity, legal constraints, and/or operational limitations.
11. Complete and update all required data elements for TWDB online planning database DB17 through the web interface.¹²
12. Compile firm yield and diversion information by Source, WUG, WWP, county, river basin, and planning region as necessary to obtain decadal estimates of existing surface water supply throughout the planning period. This will be facilitated by *TWDB DB17 Water Source Availability* and associated *TWDB DB17 WUG and WWP Existing Water Supply* reports using data provided by RWPGs

¹⁰ Available from TCEQ

¹¹ Some WUGs have ‘seller’ obligations even though they are not classified as a WWP. RWPG technical consultants must attend mandatory training on the online planning database.

¹² In accordance with the Guidelines for Regional Water Plan Data Deliverables. RWPG technical consultants must attend mandatory training on the online planning database.

and made available to all RWPGs through the online planning database interface.

13. Review, confirm the accuracy of, and incorporate the required associated planning database reports directly into the Technical Memorandum and draft and final regional water plans under Task 4C (labeled as such and with source reference).

II) Estimate a) Groundwater Availability and b) Existing WUG and WWP Groundwater Supplies:

Obtain and review the **Total Pumping**¹³ annual volumes that are developed by TWDB based on the Desired Future Conditions adopted by Groundwater Management Areas (GMAs). Total Pumping annual volumes for each aquifer will be available from TWDB through the online planning database interface, split into discrete geographic-aquifer units by: Aquifer; County; River Basin; Region; and, where applicable, additionally by Groundwater Conservation District (GCD).

1. In areas that were not considered in the DFC process and therefore do not have Total Pumping annual volumes but have 'local' groundwater supplies or minor aquifers, develop estimates according to the General Guidelines for Regional Water Plan Development.
2. Consider the impacts of the available Total Pumping annual volumes on the regional water plan including how it impacts: existing water supplies; identified water needs; and water management strategies that were recommended in the 2011 regional water plan.
3. In areas with Groundwater Conservation District (GCDs), obtain GCD Management Plans and GCD information to be considered when estimating existing supplies and water management strategies under future tasks.
4. Assign available, water supplies, as appropriate, to WUGs and WWPs including conducting demand analyses for WWPs.
5. Select hydrologic and other assumptions for distribution of available groundwater for potential future use by WUGs (e.g. via a pro-rationing policy) as either existing supply or as part of water management strategies including based on models and operational procedures appropriate for assessment of water supply and regional water planning purposes.

¹³ **Total Pumping** = [Managed Available Groundwater + exempt uses]. The estimated total pumping from the aquifer that achieves the desired future condition adopted by members of the associated Groundwater Management Area.

6. Compile TCEQ Water System Data Reports¹⁴ for municipal Water User Groups using groundwater and identify any physical constraints limiting existing water supplies to WUGs and/or WWPs. Limitations to be considered based on delivering treated water to WUGs. Other information that the RWPGs collect, for example, survey results, may be included in the evaluation of infrastructure capacity or limitations in delivering treated water to WUGs.
7. Update information on WWP contractual obligations and WUG ‘seller’ obligations to supply water to other entities including within the online planning database. Unless the RWPG considers it unlikely that a specific contract will be renewed, water supplies based on contractual agreements will be assumed to renew at the contract termination date, for example, if the contract provides for renewal or extensions. Report this information within any planning memorandums or reports, as appropriate.
8. Compile and/or update information regarding acquisitions of groundwater rights, for example, for transfer to municipal use, and account for same in the assessment of both availability and existing groundwater supplies.
9. Based on the water availability, existing infrastructure, and associated physical and legal limitations, determine the existing groundwater supply available from each water source to each WUG and WWP (including newly identified WUGs and WWPs) during a drought of record based on water availability, infrastructure capacity, legal constraints, and/or operational limitations.
10. Complete and update all required data elements for TWDB online planning database DB17 through the web interface.¹⁵
11. Compile groundwater availability information by Source, Water User Group, Wholesale Water Provider, county, river basin, and planning region as necessary to obtain decadal estimates of supply throughout the planning period. This will be facilitated by *TWDB DB17 Water Source Availability* and associated *TWDB DB17 WUG and WWP Existing Water Supply* reports using data provided by RWPGs and made available to all RWPGs.

¹⁴ Available from TCEQ

¹⁵ In accordance with the Guidelines for Regional Water Plan Data Deliverables. RWPG technical consultants must attend mandatory training on the online planning database.

III) Estimate System, Reuse, and Other Types of existing supplies

Systems, Reuse, and Other Water Supplies

1. Integrate firm water supplies for WUGs using a system of supply sources (e.g., surface water, storage, and groundwater).
2. Research and quantify existing supplies and commitments of treated effluent through direct and indirect reuse.
3. Compile systems, reuse, and other availability information by Source, Water User Group, Wholesale Water Provider, county, river basin, and planning region as necessary to obtain decadal estimates of supply throughout the planning period.
4. Assign available water supplies, as appropriate, to WUGs and WWPs including conducting demand analyses for WWPs.
5. Identify and re-categorize existing sources in the online planning database to extract unique sources. In addition to surface water, groundwater, and reuse, for example, clarify the source types in the online planning database to separate out and re-label other specific water sources such as desalinated groundwater or desalinated surface water and any other supply types that are connected supplies.
6. Review and confirm the accuracy of the *TWDB DB17 Availability* and associated *TWDB DB17 Existing Water Supply* reports from the online planning database (DB17) and incorporate these planning database reports directly into the Technical Memorandum and other planning documents (labeled as such and with source reference).
7. Identify any physical constraints limiting these existing water supplies to WUGs and/or WWPs including based on TCEQ Water System Data Reports¹⁶. Limitations to be considered based on delivering treated water to WUGs. Other information that the RWPGs collect, for example, survey results, may be included in the evaluation of infrastructure capacity or limitations in delivering treated water to WUGs.
8. Update information on WWP contractual obligations and WUG 'seller' obligations to supply water to other entities including within the online planning database. Unless the RWPG considers it unlikely that a specific contract will be renewed, water supplies based on contractual agreements will be assumed to renew at the contract termination date, for example, if the

¹⁶ Available from TCEQ

contract provides for renewal or extensions. Report this information within any planning memorandums or reports, as appropriate.

9. Based on the water availability, existing infrastructure, and associated physical and legal limitations, determine the existing system, reuse, and other water supplies available from each water source to each WUG and WWP (including newly identified WUGs and WWPs) during a drought of record based on source water availability, infrastructure capacity, legal constraints, and/or operational limitations.
10. Complete and update all required data elements for TWDB online planning database DB17 through the web interface.
11. Compile these supplies by Source, Water User Group, Wholesale Water Provider, county, river basin, and planning region as necessary to obtain decadal estimates of existing surface water supply throughout the planning period. This will be facilitated by *TWDB DB17 Water Source Availability* and associated *TWDB DB17 WUG and WWP Existing Water Supply* reports using data provided by RWPGs and made available to all RWPGs through the online planning database interface.
12. Review, confirm the accuracy of, and incorporate the required associated planning database reports directly into the Technical Memorandum and draft and final regional water plans under Task 4C (labeled as such and with source reference).

Includes all work required to coordinate with other planning regions to develop and allocate estimates of water availability and existing water supplies.

TASK 4A - IDENTIFICATION OF WATER NEEDS¹⁷ (ANALYSIS TO BE PERFORMED BY TWDB)

1. *Based upon updated projections of existing water supply and projected water demands under Tasks 2 and 3, and the associated data entered into the online planning database by RWPGs, TWDB will update computations of identified water needs (potential shortages) by:*
 - *WUGs*
 - *WWPs**As decadal estimates of needs (potential shortages) as well as by, county, river basin, and planning region.*

¹⁷ Additional guidance included in the *General Guidelines for Regional Water Plan Development* document.

2. *The results of this computation will be provided by TWDB via the online planning database to RWPGs in a customizable format that is in accordance with TWDB rules as the TWDB DB17 Identified Water Needs report.*
3. *(Regions may also request additional, unique needs analysis (e.g. for a WWP) that the RWPG considers warranted. Such reports will be provided, if feasible based on the online database constraints and TWDB resources. The RWPG will need to enter or provide any additional data into the online planning database, that may be necessary to develop these evaluations.)*
4. **The online planning database needs report will be incorporated by the RWPG directly into the Technical Memorandum and draft and final regional water plans (labeled as such and with source reference).**
5. *Upon request, TWDB will perform a socioeconomic analysis of the economic effects of not meeting the identified water needs and update and summarize potential social and economic effects of not meeting projected water needs identified under Task 4A. This report will be provided to RWPGs as part of this Task and incorporated into the draft and final regional water plans.*
6. **If the RWPG requests a socioeconomic analysis from TWDB, the resulting socioeconomic report will be incorporated into the draft and final regional water plan by the RWPG.**

TASK 4B

IDENTIFICATION OF POTENTIALLY FEASIBLE WATER MANAGEMENT STRATEGIES¹⁸

This Task includes, but is not limited to, performing all work in accordance with TWDB rules and guidance required to:

1. Receive public comment on a proposed process to be used by the RWPG to identify and select water management strategies for the 2016 regional water plan. Revise and update documentation of the process by which water management strategies that are potentially feasible for meeting a need were identified and selected for inclusion in the 2016 regional water plan. Include a description of the process selected by the RWPG in the Technical Memorandum and the draft and final regional water plans.
2. If applicable, specify what level of water conservation (as existing conservation or proposed within a water management strategy) is considered by the RWPG

¹⁸ Additional guidance included in the *General Guidelines for Regional Water Plan Development* document.

as the “highest practicable level” of conservation for WUGs and/or WWPs dependent upon water management strategies involving interbasin transfers.

3. Consider the TWDB Water Loss Audit Report and drought management when considering potentially feasible water management strategies as required by rules.
4. Update relevant portions of the regional water plan summary of existing water supply plans for local and regional entities. This task requires obtaining and considering existing water supply plans. Updated summary to be included in the draft and final regional water plans.
5. If no potentially feasible strategy can be identified for a WUG or WWP, document the reason for this in the Technical Memorandum and the draft and final regional water plans.
6. Consider recent studies and describe any significant changes in water management strategies described as being in the implementation phase in the 2011 RWP as well as any new projects in the implementation phase prior to adoption of the Initially Prepared 2016 Regional Water Plan.
7. Identify potential water management strategies to meet needs for all WUGs and WWPs with identified needs, including any new retail utility WUGs and WWPS that may have been previously aggregated under County-other in the 2011 regional water plan but which are being treated as unique entities for the 2016 regional water plan.
8. Present a list of the potentially feasible water management strategies, in table format, within the Technical Memorandum and the draft and final regional water plans.

TASK 4C PREPARE AND SUBMIT TECHNICAL MEMORANDUM¹⁹

This Task includes, but is not limited to, performing all work in accordance with TWDB rules and guidance required to:

1. Prepare a concise Technical Memorandum that summarizes the work completed under Tasks 2, 3, 4A, 4B, and 4C and the general findings. To be considered administratively complete, the Technical Memorandum submitted must include:

¹⁹ Additional guidance included in the *General Guidelines for Regional Water Plan Development* document.

- a) an executive summary that shall be no longer than 2 pages.
 - b) each of the 'TWDB DB17' online planning database reports described under Tasks 2, 3, 4A, and 4B within the body of the memorandum.
 - c) a summary section for each Task performed to date (Tasks 2 - 4C)
2. Include in the Technical Memorandum sections that:
- a) Explain reasons for significant changes in existing supplies of WUGs and WWPs.
 - b) Explain reasons for significant changes in identified water needs of WUGs and WWPs.
 - c) Specifically describe the impacts of the MAGs on the existing supplies and needs of WUG and WWPs in comparison to the 2011 regional water plan.
3. Include a separate section that is a proposed scope of work for Task 4D (evaluation and recommendation of water management strategies) that the RWPG considers necessary to complete its 2016 regional water plan, including an estimated budget for this work.²⁰ Section will include:
- a) a list of the potentially feasible water management strategies that are to be evaluated by the RWPG (and considered and potentially recommended by the RWPG). For each potential strategy listed:
 - a budget line item for performing a technical evaluation
 - information on what past evaluations have been performed for the potentially feasible water management strategy by the RWPG and/or others.
 - proposed scope of work for the proposed strategy technical evaluation.²¹

²⁰ Additional guidance on the content and format to be included in the proposed scope of work and budget to be prepared under Task 4D may be provided by TWDB to RWPGs at a later date.

²¹ Technical evaluations of water management strategies and the 2016 regional water plan will include assessment of: quantity, reliability, and cost of water; environmental factors; impacts on water resources; threats to agricultural and natural resources; interbasin transfer provisions; third party effects; and other relevant factors. Water management strategy documentation will include description and discussion of planned facilities, dependable supply in drought of record, environmental factors, engineering & costing considerations, and implementation issues in accordance with TWDB rules and guidance.

- b) a proposed scope of work and budget, broken down by water management strategy, to:
- update technical analyses and documentation of water management strategies contained in the 2011 regional water plan for inclusion in the 2016 plan (e.g. including capital and annual cost updates).
 - update or revise technical evaluations and documentation of water management strategies, based on new information from on-going studies outside of regional planning by project sponsors.
- c) a proposed scope of work and budget, broken down by item, to:
- select recommended water management strategies.
 - assign recommended strategies to meet projected needs.
 - consider alternative strategies for inclusion in the plan.
 - document evaluation of and selection of recommended water management strategies.
 - coordinate with sponsoring water user groups, wholesale water providers, and/or other resource agencies regarding any changed conditions in terms of projected needs, strategy modifications, planned facilities, market costs of water supply, endangered or threatened species, etc.
 - revise and/or update the water supply plan in the regional water plan for each WUG and WWP.
 - evaluate and/or update the estimated cumulative impacts of the regional water plan, for example on groundwater levels, spring discharges, bay and estuary inflows, and instream flows.
- d) proposed budget to complete and update all required data elements related to water management strategies for TWDB online planning database DB17 through the web interface; and, review, and confirm the accuracy of, and incorporate the required associated planning database reports into the draft and final regional water plans.
- e) description of how initially contracted Task 4D funds would specifically be spent, based on the budget items summarized in subsections a-d, if TWDB were to issue a written notice-to-proceed for Task 4D work.²²

²² It is anticipated that TWDB agency rules will be revised prior to RWPGs beginning evaluations of WMSs under Task 4D; contract to be amended at a future date to incorporate additional funding (or reallocate remaining funding) to complete planning tasks and to incorporate any agency rule and guidance document updates.

4. Approve submittal of the Technical Memorandum to TWDB at a regular regional water planning group meeting. The Technical Memorandum must be submitted to TWDB no later than November 30th 2012.

TASK 4D EVALUATE AND RECOMMEND WATER MANAGEMENT STRATEGIES²³

*Work under this task to be performed only after written notice-to-proceed.²⁴
Contract to be amended based scope of work to be developed and negotiated with TWDB under Task 4C.*

TASKS 5, 6, 7, 8, AND 9

(to be scoped, budgeted and incorporated by amendment into the contract at later date)

TASK 10 PUBLIC PARTICIPATION AND PLAN ADOPTION²⁵

This Task includes all work and eligible expenses required to hold meetings and include public input and participation through task 4C and a portion of 4D in accordance with TWDB rules and guidance:

Including, but not limited to:

1. Holding regular RWPG meetings
2. Posting public notices
3. Holding public input meetings
4. Holding special meetings
5. Collect and disseminate public input.
- 6. Costs of technical and other consultants, as needed, to prepare for and participate in RWPG meetings, workshops, hearings, and any other special meetings during the development of the 2016 Regional Water Plan.**
7. Costs of performing any surveys of water suppliers or water user groups.
8. Coordination with and collection of information from groundwater conservation districts, water users, wholesale water providers, and any other entity involved with water planning in the region.
9. Assemble the Technical Memorandum document for submission to TWDB.

²³ Additional guidance included in the *General Guidelines for Regional Water Plan Development* document.

²⁴ It is anticipated that TWDB agency rules will be revised prior to RWPGs beginning evaluations of WMSs under Task 4D; contract to be amended at a future date to incorporate additional funding (or reallocate remaining funding) to complete planning tasks and to incorporate any agency rule and guidance document updates.

²⁵ Additional guidance included in the *General Guidelines for Regional Water Plan Development* document.

DRAFT

10. Revise relevant portions of the 2011 regional water plan for inclusion in the draft and final 2016 regional water plan.
11. Interregional cooperation and interregional conflict resolution efforts.

QUALIFICATIONS

REED EICHELBERGER, P.E.

Biographical Information

Reed Eichelberger currently serves as General Manager of the San Jacinto River Authority. He brings to this job a broad base of civil engineering and management experience related to water resources, structural design, hydraulics, water and wastewater collection and treatment, roadway design, cost development, and construction management. His duties as General Manager include oversight and responsibility for SJRA operations and supervision of all SJRA personnel. Before becoming General Manager, Reed served for nine years as Deputy General Manager of the SJRA.

Prior to his SJRA service, Reed was Director of Marketing and Senior Project Engineer with Steffek & Van De Wiele, Inc., reporting directly to that company's president. From 1974 to 1992, he served in various managerial capacities with Binkley & Holmes, Inc. (later Binkley & Barfield, Inc.) with such diverse clients as the City of Houston, University of Houston, Harris and Montgomery counties, and large and small private developers.

Mr. Eichelberger received his Bachelor of Science Degree in Civil Engineering from the University of Houston. He is a Registered Professional Engineer in the State of Texas.

Contact: San Jacinto River Authority
P.O. Box 329, Conroe, Texas 77305
1577 Dam Site Road, Conroe, Texas 77304

Phone: (936) 588-111
Fax: (936) 588-3043
E-mail: reichelberger@sjra.net

JACE A. HOUSTON
Biographical Information

Jace Houston currently serves as Deputy General Manager-Administration for the San Jacinto River Authority, a public agency created by the legislature in 1937 for the purpose of developing, conserving, and protecting the water resources of the San Jacinto River basin. Mr. Houston oversees the administrative managers and functions of the river authority including legal, finance and accounting, information technology, risk management, and human resources, and he is also responsible for the authority's legislative and public relations programs.

Before beginning his service at the San Jacinto River Authority, Mr. Houston served as General Counsel for the Harris-Galveston Subsidence District, which is a special purpose district created by the legislature in 1975 charged with the responsibility of regulating groundwater withdrawals in Harris and Galveston counties in order to control subsidence. Mr. Houston's duties included overseeing the postings and procedures for meetings of the District's 19-member board, coordinating with the District's permitting group on enforcement matters, and providing general legal advice on any matters before the District.

Mr. Houston previously served as a staff attorney and policy analyst for the Office of Policy and Regulatory Development at the Texas Natural Resource Conservation Commission. While at the TNRCC, he provided support on state and federal legislative matters and also assisted in the development of regulations and policy positions in the areas of municipal and industrial solid waste and hazardous waste. Prior to this position, Jace worked for State Representative Robert Saunders in the Texas House of Representatives, serving as General Counsel for the Land and Resource Management Committee.

Mr. Houston received his law degree from the University of Texas School of Law, and holds a Bachelor of Science Degree in Civil Engineering from the University of Texas at Austin.

November 19, 2010

Mr. Reed Eichelberger, P.E.
Secretary of the Region H WPG
San Jacinto River Authority
1577 Dam Site Road
Conroe, Texas 77304

Dear Mr. Eichelberger:

The Region H Water Planning Group (Region H WPG) has been a model of success for regional water planning for the past 14 years, as regional planning has moved from a process primarily in support of the development of the State Water Plan to an important collaboration with direct ties to funding of critical water supply infrastructure. We (Jeff Taylor and Mike Reedy) have been integral parts of this transformation – and the only constants among consultants and Region H leadership throughout its history -- by helping to guide, inform and collaborate with the Region H WPG and its stakeholders since the group's inception:

- Jeff Taylor has served as a leader in regional water planning since the early 1990s, serving as the lead consultant to the early "Trans-Texas" planning process. With the passage of S.B. 1, Mr. Taylor became the lead consultant to the Region H WPG, and then later served as chairman of the Region H WPG.
- Mike Reedy served as the lead consultant to the Region H WPG from 2000 until 2009, playing a leadership role in the development of two of the three regional plans.
- Our team also includes John Seifert with LBG-Guyton Associates and Glenda Calloway with Ekistics Corporation. Both Mr. Seifert and Ms. Calloway have served your group since the inception of regional planning.

Stewardship of the regional planning process requires senior leadership that has earned the trust of the local and regional stakeholders. We believe we have earned this trust, having lived and worked with those stakeholders for a combined 40 years, including the three primary stakeholder groups: water suppliers, municipal WUGs and the environmental community.

In compliance with the RFQ, we acknowledge:

- If requested, we will prepare and make a presentation to the Region H WPG
- If selected, the key individuals of the proposed team will not be changed without Region H WPG's written approval
- If selected, we will conform to TWDB rules and requirements for grant funding and invoicing

Thank you for this opportunity. We are committed to providing the Region H WPG the same level of professional service, guidance and consultation as you've seen in the past.

Sincerely,

Jeff Taylor
Principal and Vice President

Michael V. Reedy, P.E.
Water Resources Group Manager

1. Similar Projects

(because of FNI’s considerable water supply planning experience, we have chosen to feature our broader experience with specific types of projects)

Regional Groundwater Study and Regulatory Plan Update, Harris-Galveston Subsidence District

Contact

Ron Neighbors, General Manager
 Harris-Galveston Subsidence District
 281-486-1105; rneighbors@subsidence.org

Project Team Members

Mike Reedy, Jeff Taylor, Bill Thaman, LBG-Guyton Associates

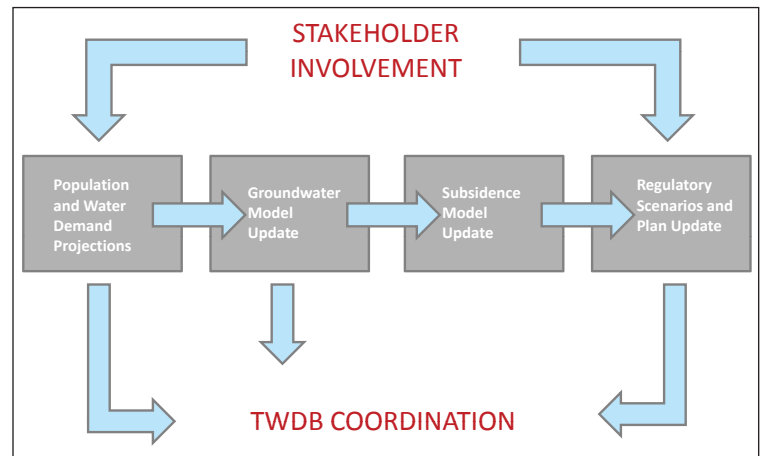

Time Schedule

Ongoing (estimated 2012 completion)

FNI is updating the regional groundwater study and regulatory plan for the Harris-Galveston Subsidence District (HGSD), Fort Bend Subsidence District, and Lone Star Groundwater Conservation District.

The project includes detailed population and water demand projections for the counties which comprise the Region H Planning Area, updating the groundwater model using the Texas Water Development Board (TWDB) Northern Gulf Coast Groundwater Availability Model (GAM), development of a subsidence predictive model for Harris, Galveston and Fort Bend Counties, and development of long-term regulatory plans for the reduction of groundwater pumping.

A formal and robust stakeholder participation process has been initiated and will continue to be advanced throughout the duration of the project. Stakeholders include the City of Houston, San Jacinto River Authority, Gulf Coast Water Authority, the Regional Water

Authorities, and other major municipalities and water providers in our region.

FNI is collaborating with the U.S. Geological Survey and TWDB to develop detailed population and water demand projections and update of the regional groundwater model. TWDB is in agreement that important elements of this study (i.e., population and water demand projections and the groundwater model) will be incorporated into the Region H plan and will form the basis for regional water planning in our area.

The Texas Legislature created the Harris-Galveston and Fort Bend Subsidence Districts to provide for the systematic reduction of groundwater pumping. This regulatory plan will help shape the water supply environment for our region as it converts from a groundwater-based supply system to surface water.

S.B. 1 Regional Water Planning

Contact

Jim Parks, P.E., Chairman
 Region C Regional Water Planning Group
 972-442-5405; jiparks@ntmwd.com

Project Team Members

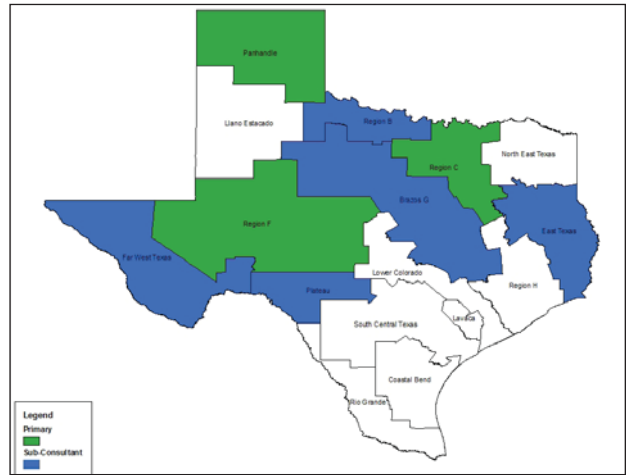

Mike Reedy, Jeff Taylor, Tom Gooch, Simone Kiel, Jon Albright, Lucia Lee,
 Bill Thaman, Jeremy Rice, LBG-Guyton Associates, Ekistics Corporation

Time Schedule

1998-2002 (1st round); 2003-2006 (2nd round); 2007-2010 (3rd round)

FNI plays an integral role in the S.B. 1 Regional Water Plans as a consultant in eight of the 16 regions, serving as the prime consultants in Regions A, C and F. FNI has served as a subconsultant in Regions B, E, G, I and J. Prior to joining FNI, Mike Reedy and Jeff Taylor were consultants for Region H.

As the prime consultant in three diverse regions, FNI provided technical evaluations of regional issues and facilitated resolutions to concerns raised by planning group members and stakeholders. Our experience in Region C provides working knowledge of the challenges of rapidly growing urban areas and its effect on surrounding suburban and rural counties.

FNI has been involved with regional water planning since its inception. We are intimately familiar with the rules and guidelines for regional planning and have developed good working relationships with TWDB staff. FNI has developed a vast resource of data and is familiar with available planning data from state and federal agencies (including historical water use, sources of supplies and water sales). We also worked closely with TWDB staff and our respective planning groups on reviewing and developing population and water-use projections over the 50-year planning horizon.

Water Availability Modeling

Contact

Jim Forte, Manager, Planning & Development
 Brazos River Authority
 254-761-3127; jforte@brazos.org

Project Team Members

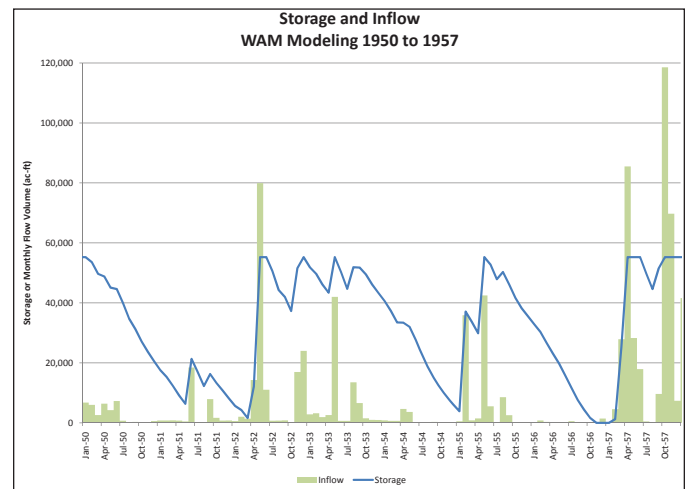

Tom Gooch, Jon Albright

Time Schedule

1998 – Ongoing

One of the key elements of S.B. 1 Regional Water Supply Planning is the development and execution of new Water Availability Models (WAMs). FNI participated in developing the WAMs for the Neches, Trinity, San Jacinto and Brazos River Basins and the Neches-Trinity, Trinity San-Jacinto and San Jacinto Brazos Coastal Basins. FNI-developed WAMs have been used for evaluations of water management strategies for Regions B, C, E, F, G, H, I and J, including a complex “no call” analysis performed for Regions F and K using the Colorado WAM.

FNI also has supported water supply studies using the Red, Sulphur, Cypress, Sabine, Neches, Trinity, San Jacinto, Brazos, Brazos-Colorado, Colorado, Lavaca and Rio Grande WAMs.

FNI has assisted our clients using related WAMs for water rights applications and other projects including the Brazos River Authority (Brazos WAM), San Jacinto River Authority and Angelina & Neches River Authority (Neches WAM), and North Texas Municipal Water District (Red River WAM). FNI also has assisted with smaller water rights applications using the Trinity, Brazos, Red and Sulphur WAMs.

FNI has supported S.B. 3 environmental flow analyses using the Sabine and Neches WAMs and analyses of environmental flows and bay and estuary impacts using the Lavaca WAM.

Project Team Members

Mike Reedy, Steve Watters, Jon Albright

Time Schedule

2008 – Ongoing

With the passage of S.B. 3, Texas is currently in a joint planning process to develop environmental flows for the state's major river basins. FNI is playing a major role in this process. Mike Reedy is currently a member of the Trinity and San Jacinto Rivers and Galveston BBEST. Steve Watters, Senior Environmental Scientist and FNI Principal, is a member of the Colorado-Lavaca Rivers Basin and Bay Expert Science Team (BBEST). Jon Albright, Hydrologist and FNI Associate, conducted hydrological evaluations for the Sabine-Neches BBEST using the TCEQ WAMs for the Sabine and Neches Basin and the Hydrology-Based Environmental Flow Regime (HEFR) tool. Mr. Albright has also participated in a modeling committee sponsored by the Science Advisory Committee that oversees the technical aspects of S.B. 3.

Water Supply: Dams and Reservoirs

Contact

Warren Samuelson, P.E., Dam Safety Program Coordinator
Texas Commission on Environmental Quality
512-239-5195; wsamuels@tceq.state.tx.us

Project Team Members

Mike Reedy, Tom Gooch, Jon Albright, Simone Kiel, Cody Cockroft, Lucia Lee, Steve Watters

Time Schedule

1910 – Ongoing

The current Region H plan recommends several new water supply reservoirs to meet future needs. FNI understands the complexities of water supply development and the political sensitivities of recommending new reservoir projects in Texas. FNI has assisted water suppliers with the permitting, design and/or construction of over 150 major dams in Texas. In Region H, FNI has conducted studies or design projects at 10 dams and is the engineer of record for Lake Conroe.

In addition to study-through-construction projects, FNI's recent water supply projects include:

- Currently assisting clients with the permitting of two new reservoir projects

FNI recently completed the first Instream Flow Study conducted under the guidelines of the Texas Instream Flow Program for the purposes of a water right permit application. FNI conducted an instream flow study on Bois d'Arc Creek in support of the permitting activities for the proposed Lower Bois d'Arc Creek Reservoir project.

FNI applied an interagency approach to the study to define the study area, adopt methodologies and assist with data collection. FNI worked closely with TCEQ, Texas Parks and Wildlife Department, TWDB, US Forest Service (Caddo National Grasslands), U.S. Army Corps of Engineers, U.S. EPA, and U.S. Fish and Wildlife Service to gain consensus and address concerns raised by agency staff. This study evaluated the four technical components that characterize stream conditions: hydrology and hydraulics, fluvial geomorphology, water quality, and aquatic biology. Biological sampling, habitat mapping, stream flow measurements and geomorphic studies were conducted at five primary sampling reaches. Data were evaluated in light of the definition of "sound ecological environment" for the Bois d'Arc Creek.

Hydrological modeling was conducted to assess stream flow patterns with and without the reservoir. These data were used to recommend instream flows that provide a sound ecological environment for Bois d'Arc Creek downstream of the proposed reservoir.

- Updated TCEQ's *Hydrologic and Hydraulic Guidelines for Dams in Texas*
- Water rights permit amendment to develop Allens Creek Reservoir in Region H
- Reservoir Site Acquisition Study that was the basis for recommendations in *Unique Reservoir Sites* to the Texas Legislature
- *Report 126 – Inventory of Dams* for TWDB

REGION H WATER PLANNING GROUP

STATEMENT OF QUALIFICATIONS

Region H Water Planning Group Regional Water Plan

Mike Reedy, P.E.

Project Manager

Mike Reedy is FNI's Manager for its Water Resources–Houston Group, responsible for projects relating to water and wastewater planning, infrastructure, treatment and hydrologic and hydraulic evaluations. He is a key liaison between his clients and federal, state and local agencies for rules interpretations, permitting issues, and compliance criteria. Mr. Reedy is currently a member of the Trinity and San Jacinto Rivers and Galveston Bay and Basin Expert Science Team (BBEST). Mr. Reedy's experience includes:

- Regional Groundwater and Regulatory Plan Update, Harris-Galveston Subsidence District, Fort Bend Subsidence District, and the Lone Star Groundwater Conservation District – Consultant Team Leader. Results will define the regional water supply environment for the area's four most populous counties for the next 60 years. Stakeholder involvement is a key element in the development of population and water demand projections, which will serve as the basis for projections in the next round of regional planning.
- Region H Water Plan, Region H Water Supply Planning Group – Project Manager. In compliance with TWDB regional planning guidelines, this plan identified water needs and water supply strategies for a 50-year planning period. As part of the regional water planning process for Region H, Mr. Reedy also directed numerous studies to address bay-and-estuary flow needs related to projects in the Region H Regional Water Plan. Mr. Reedy has worked with area stakeholders including SJRA, TRA, BRA, GCWA, and the City of Houston. He also has led the efforts in developing drought management studies, interruptible supply studies, reuse and return flows studies as part of Region H water planning.

Mr. Reedy is currently serving as a member of the Trinity and San Jacinto Rivers and Galveston Bay and BBESTs where he assisted in the development of recommended environmental flow regimes for both instream and bay and estuary flows as part of the S.B. 3 environmental flows process. Mr. Reedy has presented the results of environmental flows studies performed as part of the S.B. 1 regional planning efforts for Region H to both the Trinity and San Jacinto Rivers and Galveston Bay and Basin Stakeholder and Science Advisory Committees.

Jeff Taylor

Principal-in-Charge

Jeff Taylor is FNI's Southeast Division Manager, a firm Vice President and a Principal. His experience ranges from leading small teams of consulting engineers to management of the 1,450-person water/wastewater operations for the City of Houston public utility. He is a past appointee of the Governor of Texas on the Environmental Flows Advisory Committee and was chairman of the Region H Regional Water Planning Committee.

Mr. Taylor managed the City of Houston water and wastewater utility operations which includes a water system that provides an average of over 400 MGD from three surface water treatment plants and 90 groundwater pump stations through approximately 7,500 miles of transmission and distribution pipelines. While at the City, he managed:

- Development and construction of the 80-MGD NEWPP surface water treatment plant using design-build-operate delivery model
- Obtaining a 99,650-acre foot water rights permit for future Allens Creek Reservoir and Dam

As a private consultant, he managed the Water Availability Studies for the Neches and Trinity basins and worked on the WAMs for the San Jacinto and Brazos basins. He also has extensively modeled Galveston Bay Inflows. He has assisted the Subsidence District to develop its 1999 Regulatory Plan and is very familiar with groundwater usage and regulation throughout the region. He served as Program Manager of the precursor to Regional Water Planning through his efforts on the Trans-Texas Water Program. He also served as the lead consultant to the Region H WPG and is a former Region H WPG Chairman.

Experience

B.S., Materials, Texas A&M University

Registration

Professional Engineer, Texas #84024

Bill Thaman has served as a Project Manager on a variety of water resources planning studies, including the Region K Regional Water Plan, Groundwater Management Area 14, two large studies to develop the regulatory approach and facilities plan for a regional conjunctive use system in Montgomery County and is on the project team for the HGSD Regional Groundwater Study and Regulatory Plan Update project currently underway in the Region H area. His 11 years experience includes regional water supply planning, regional facility planning, groundwater modeling, hydraulic and hydrologic modeling, water and wastewater master planning, storm water master planning, Geographic Information Systems (GIS) analysis and customization, and engineering software development.

Richard Weatherly, P.E.

Population and Water Demand Forecasting

Education

B.S., Civil Engineering, University of Texas at Austin

Registration

Professional Engineer, Texas #100211

Richard Weatherly is a Houston-based member of FNI's Water/Wastewater Master Planning Group. His strength is in the development of system models for master planning, Capital Improvement Plans and impact fee studies. His seven years experience includes training of clients in the use of modeling software and the integration of GIS into models. His software experience includes the use of InfoWorks, H2ONET, H2OMap Water, H2OMap Sewer and HYDRA. In addition to numerous municipal water system plans throughout Texas, he has worked on the Groundwater Rule Assistance project for the San Jacinto River Authority and on water, wastewater and recycled water system models for the San Antonio Water System.

Steven Polanksy, E.I.T.

Population and Water Demand Forecasting

Education

B.S., Civil Engineering, University of Texas at Austin

Registration

Engineer-in-Training #44117

Steven Polanksy is a Houston-based water/wastewater planner with two years experience prior to joining FNI. His FNI background includes Unidirectional Flushing Program, City of Pearland, King's Creek Wastewater Treatment Plant Improvements, City of Terrell, and the Water/Wastewater Master Plan, City of Mansfield.

Dan Gise

Environmental Assessment (Task Leader)

Education

M.S., Biology, Stephen F. Austin State University

B.S., Forestry/Biology, Stephen F. Austin State University

Dan Gise is an Environmental Scientist and FNI Associate with broad knowledge and experience with environmental issues for a wide variety of project types and clients. Mr. Gise has 30 years of experience in environmental impact statements, environmental assessments, permitting, inter-agency coordination and numerous other types of environmental studies and permitting activities. His recent experiences include Texas Instream Flow Program stakeholder meetings (Brazos River Basin) permit application for the proposed 8,900-acre Allens Creek Reservoir, Brazos River Authority, and environmental site assessment for Lake Texana, Lavaca-Navidad River Authority.

Steve Watters, PWS

Environmental Assessment

Education

M.S., Forest Hydrology, Stephen F. Austin State University

B.S., Forest Management, Stephen F. Austin State University

Registration

Professional Wetland Scientist #000832

Steve Watters is an FNI Principal and, during his 29-year career, has served as Project Manager and Lead Scientist for instream flow studies, environmental assessments and impact studies, water quality sampling and modeling studies, and wetlands permits. He has 25 years of instream flow experience with IFIM, PHABSIM modeling, and the Texas Instream Flow Program. Mr. Watters' background includes instream flow studies for the proposed Lower Bois d'Arc Creek Reservoir, the proposed South Bend Reservoir and the Owen Ivey (Stacy) Reservoir. He also was Environmental Scientist for water rights permitting for the proposed Allens Creek Reservoir.

Jon Albright

Environmental Assessment

Education

B.S., Hydrology and Water Resources, Tarleton State University

Jon Albright is an FNI Associate and Hydrologist/Project Manager with 29 years experience. He has participated in a wide variety of water resource planning and water supply modeling projects.

STATEMENT OF QUALIFICATIONS

Region H Water Planning Group Regional Water Plan

He has extensive experience in hydrologic modeling, including development of custom models using the Fortran, C++ and Visual Basic programming languages, as well as using model applications such as the Water Rights Analysis Package (WRAP), RiverWare, LCRA RESPONSE model and RESOP. Mr. Albright has provided water supply analysis support to the Region B and C Regional Water Plans. He also has updated water availability models of the Brazos, Trinity, Neches and San Jacinto-Brazos River Basins.

Lucia Lee, P.E.

Water Infrastructure Planning (Task Leader)

Education

B.S., Structural Engineering, University of California, San Diego

Registration

Professional Engineer, Texas #82485 (three states total)

Lucia Lee has worked extensively in the Houston metropolitan area on a variety of projects during the past 22 years. Prior to joining FNI, Ms. Lee's work included serving as an area manager for the \$1.2-billion Greater Houston Wastewater Program. She started her career at the City of San Diego designing water and wastewater utility projects and managing design consultant contracts. She also was on the consultant team for the development of the 2006 Region H Regional Water Plan.

Cody Cockroft, P.E.

Water Infrastructure Planning

Education

M.S., Engineering Management, Texas A&M University

B.S., Civil Engineering, Texas A&M University

Registration

Professional Engineer, Texas #97255

Cody Cockroft is a Water Resources Engineer with 10 years consulting and owner experience. Prior to FNI, Mr. Cockroft managed the Lower Colorado River Authority's (LCRA) Dam Safety Program and supervised the Water Service's Civil Engineering Design Team. His responsibilities included design or management of capital and O&M projects for all LCRA-owned and operated dams; dam inspection and maintenance schedules; and lead design and analysis efforts for three Texas Gulf Region irrigation districts which included nine pump stations and more than 1,100 miles of canal levees. Mr. Cockroft is Project Manager for FNI's Highlands Reservoir and siphons projects with the San Jacinto River Authority.

Jeremy Rice

Surface Water Planning

Education

M.S., Water Management and Hydrological Science, Texas A&M University

B.S., Renewable Natural Resources, Texas A&M University

Jeremy Rice is a Hydrologist with four years experience in water resources projects. Mr. Rice's background includes Analysis of Naturalized Flow vs. Rainfall, Harris County; Water Availability Analysis, PPG Industries; Lake Level Study, San Jacinto River Authority; and the Lavaca River Water Supply Project, Lavaca-Navidad River Authority.

Mike Reedy will be the Task Leader for Surface Water Planning. Bill Thaman and Jon Albright also will contribute to this task.

Tom Gooch, P.E.

Quality Assurance / Quality Control (Task Leader)

Education

M.S., Civil Engineering (Water Resources), Stanford University

B.S., Civil Engineering (Water Resources), MIT

Registration

Professional Engineer, Texas #50668 (five states total)

Tom Gooch is an FNI Vice President and the firm's Water Supply Planning Group Manager. He serves as Project Manager for water supply planning, analyses of water rights, reservoir operation studies, water quality evaluations, analyses of flooding, preliminary design and cost estimates for water supply projects and transmission systems, economic analyses, and water and sewer rate studies. Mr. Gooch's 33-year background includes: Water Availability Modeling for the Brazos, Trinity, San Jacinto, Neches and three coastal basins (Principal-in-Charge); S.B. 1 Region C Regional Water Plan; Watershed Management Plan, Sabine River Authority; Trinity Water Availability Study, Trinity River Authority, Tarrant Regional Water District and the City of Houston; and the Reservoir Site Protection Study, Texas Water Development Board.

Simone Kiel, P.E.

Quality Assurance / Quality Control

Education

M.S., Environmental Engineering, Rice University

B.S., Civil Engineering, Rice University

Registration

Professional Engineer, Texas #93615

Simone Kiel is an FNI Associate and Water Supply Planner whose 24 years experience includes water management planning, reservoir operation studies, and groundwater and surface water availability evaluations. Ms. Kiel has worked with S.B. 1 Regional Water Planning since its inception, and has worked with consultant teams in Regions A, B, C, E, F and G. She also was Project Manager for a water rights application and 404 permit application for the Lower Bois d'Arc Creek Reservoir Phase II, North Texas Municipal Water District, and was a team member for the Reservoir Site Protection Study, Texas Water Development Board.

3. Subcontractors

LBG-Guyton Associates

LBG-Guyton Associates provides groundwater hydrology and environmental services. Its predecessor firm, William F. Guyton Associates, was formed in 1951 and performed groundwater resources and development projects in Texas and other states in the south and southwest region of the United States, and that tradition continued with LBG-Guyton. The firm has offices in Austin and Houston, which have been in existence since 1951 and 1958, respectively. LBG-Guyton Associates has a staff of 10 personnel in the Austin office and 5 personnel in the Houston office. LBG-Guyton staff includes experienced hydrogeologists, engineers and hydrologists performing office and field evaluations for projects.

Work with Region H Water Planning Group

LBG-Guyton, under the direction and leadership of John Seifert, P.E., has been a key member of the Region H Water Planning Group consulting team during all of the past rounds of regional water planning, working closely with Region H stakeholders.

Ekistics Corporation

Ekistics Corporation was formed in 1987 to provide environmental and socioeconomic assessments and public policy and public involvement services. Major clients have been engineering firms, local governments, or government agencies in Texas, primarily in the Houston area. For the past decade, assisting decision makers with issues related to the supply of water or the response to flooding has been the central focus of the firms' projects. Ekistics has concentrated on a high quality of service provided, with principals serving as key personnel on every project.

Work with Region H Water Planning Group

Glenda Calloway, Principal for Ekistics Corporation, has assisted Region H with public participation, analysis of environmental and socioeconomic impact analyses and related recommendations for each of the past Region H planning efforts.

4. Capability to Commit Resources

As Principal-in-Charge, Jeff Taylor has the authority and the responsibility for committing the resources needed to meet this project's schedule. FNI has 440 multi-discipline engineering, environmental science, planning, architecture and construction services professional and support personnel – all located in Texas – to tap, as needed, to address your project's goals and challenges.

The previously named FNI and subcontractor team members are available to the Region H Regional Water Planning Group throughout the duration of the planning cycle. In no event shall the key individuals named in this submittal including Jeff Taylor, Mike Reedy, John Seifert and Glenda Calloway be changed without the prior written approval of the Region H Regional Water Planning Group.

5. Additional Information

Trusted Advisors

Jeff Taylor and Mike Reedy have earned the title of trusted advisor to major stakeholders throughout our region. They have worked in the field of water resources here in the Region H area for a combined 40 years.

During this time, they have each had the opportunity to serve in leadership positions in our region, focusing on the largest and most critical water resource issues. As a result, they have developed relationships with local and regional water providers. They have the trust and respect of three constituent groups in the field of water resources: water suppliers, WUGs at the municipal level and the environmental community. This trust is based on demonstrated competence, technical understanding and historical actions.

Mr. Taylor and Mr. Reedy have lived and worked in the Region H area for the majority of their careers. The relationships they have with local, state and federal decision makers provides a level of credibility to the Region H RWPG unmatched by any others.

Senior Leadership

While many of the activities of the Region H WPG consultant are technical in nature, stewardship of the Region H WPG requires senior leadership that exhibits the confidence of a proven background and has the trust of the local and regional stakeholders.

Many issues addressed throughout the planning cycle have the potential for creating negative public outcry. Mr. Reedy and Mr. Taylor will provide the Region H WPG with the expert guidance and political sensitivities required to avoid unnecessary negative public debate.

They have honed these leadership and stewardship skills managing the City of Houston municipal utility, serving at the Texas Commission on Environmental Quality, representing the Governor of Texas within the Environmental Inflows discussion, and serving the State of Texas on EPA water stakeholder groups.

Stability

FNI is the oldest privately owned engineering firm in Texas. We have served our water clients for the past 116 years, including the past 20 here in the Region H area. FNI has demonstrated its stability and technical horsepower as one of the most respected water resources engineering firms in Texas.

FNI has led the Texas water resources industry in the development of dams, reservoirs and infrastructure, the establishment of Dam Safety Guidelines and Rules for TCEQ, and the development of environmental standards for instream flow assessments.

FNI's vision is simple: *Be the firm of choice for clients and employees.* In the Region H area, Mr. Taylor and Mr. Reedy are achieving this

vision by fulfilling FNI's mission – *Innovative Approaches ... Practical Results ... Outstanding Service* – for our water resources clients.

Local Knowledge

The FNI Project Team provides the most comprehensive knowledge of the local/regional water landscape. Regional planning throughout Texas was an outgrowth of planning efforts deemed "Trans-Texas" in the 1990s. Mr. Taylor managed the Trans-Texas Regional Plan for all of Southeast Texas. He also managed the consultant team that served Region H for its first five-year plan. Mr. Reedy then managed that consultant team for the following 10 years. They have an unmatched understanding of the water supplies, critical issues and potential solutions for our regional water problems. They have worked closely with the major water providers and users in our region, building ideas and concepts for water strategies and regulations that are being considered, planned and, in some cases built today.

FNI has developed the water availability models for the Trinity, San Jacinto, Brazos and all of the region's coastal basins and additionally through LBG-Guyton Associates has been involved in groundwater analysis throughout the region.

Strategic Involvement

FNI currently serves as the lead consultant to the Harris-Galveston Subsidence District in the development of a Regional Groundwater Update and Regulatory Plan Update. The results of this project will define the regional water supply environment for our four most populous counties in this area for the next 60 years. In addition, the population and water demand projections developed as part of this study are being developed through an extensive stakeholder process and will serve as the basis for projections developed in the next round of regional planning.

Coordination between the Region H WPG and the project team for the Regional Groundwater Update will be critical to ensure that regional planning incorporates the realities of groundwater regulations and reductions in our region. Mr. Taylor and Mr. Reedy each serve in leadership positions on the Regional Groundwater Study which represents an obvious synergy to the Region H WPG.

Bench Strength

FNI represents leadership in Texas' water resources planning. Many firms can boast of having the ability to perform water resources planning; however, FNI is involved in half of the 16 regional water planning groups in Texas, serving as the lead consultant in three of those regions. Along with the FNI technical staff available in the Region H area, FNI has extensive regional water planning staff in other areas of the state that can provide the bench strength necessary to undertake large assignments in an efficient and expedient manner.

NOTICE TO PUBLIC
 Regional Water Planning
 NOTICE DATE: March 31, 2011

Notice is hereby given that the San Jacinto River Authority (SJRA) will submit by 5 pm on April 8, 2011, a grant application for financial assistance to the Texas Water Development Board (TWDB) on behalf of the Region H Water Planning Group (Region H), to carry out planning activities to develop the 2016 Region H Water Plan as part of the state's Fourth Cycle (2012-2016) of Regional Water Planning.

The Region H area includes all or part of the following counties: Austin, Brazoria, Chambers, Fort Bend, Galveston, Harris, Leon, Liberty, Madison, Montgomery, Polk,

San Jacinto, Trinity, Walker, and Waller.

Copies of the grant application may be obtained from SJRA when it becomes available or online at www.regionhwater.org. Written comments from the public regarding the grant application must be submitted to SJRA and TWDB prior to TWDB Board action on this application. Comments must be received by May 4, 2011, and can be submitted as follows:

Reed Eichelberger, General Manager
San Jacinto River Authority
P. O. Box 329
Conroe, Texas 77305-0329

Melanie Callahan
Interim Executive Administrator
Texas Water Development Board
P. O. Box 13231
Austin, Texas 78711-3231

NOTICE OF PUBLIC MEETING
Regional Water Planning
Notice Date: March 31, 2011

Agenda: Notice is hereby given that the Region H Water Planning Group (RHWPG) is seeking input from the public on the scope of planning activities to be considered during the Fourth Cycle of Regional Water Planning.

The Public Meeting will be held in conjunction with the upcoming regular RHWPG meeting, to be held at the offices of the San Jacinto River Authority, 1577 Dam Site Road, Conroe, Texas 77305, May 4, 2011 at 10:00 a.m. Written and oral comments (not to exceed five (5) minutes per speaker) regarding the scope of activities to be considered during the Fourth Cycle of Regional Water Planning will be accepted at this meeting. Written comments may be mailed, emailed or faxed and will be accepted as part of the record if received by 10 a.m. on May 4, 2011. Comments may be mailed to:

Hon. Mark Evans, Chair, RHWPG
c/o San Jacinto River Authority
P. O. Box 329
Conroe, Texas 77305

Comments may be emailed to the RHWPG website at www.regionhwater.org, or faxed in care of SJRA at 936-588-3043.

The Region H area includes all or part of the following counties: Austin, Brazoria, Chambers, Fort Bend, Galveston, Harris, Leon, Liberty, Madison, Montgomery, Polk, San Jacinto, Trinity, Walker, and Waller.

A copy of the current 2011 Regional Water Plan is available on the RHWPG website at www.regionhwater.org or on the Texas Water Development Board site at <http://www.twdb.state.tx.us/wrpi/rwp/3rdround/2011RWP.asp>.

REGION H WATER PLANNING GROUP

Senate Bill 1 - Texas Water Development Board

c/o San Jacinto River Authority

P. O. Box 329, Conroe, Texas 77305

Telephone 936-588-7111

NOTICE TO PUBLIC

Regional Water Planning

NOTICE DATE: March 31, 2011

Notice is hereby given that the San Jacinto River Authority (SJRA) will submit by 5 pm on April 8, 2011, a grant application for financial assistance to the Texas Water Development Board (TWDB) on behalf of the Region H Water Planning Group (Region H), to carry out planning activities to develop the 2016 Region H Water Plan as part of the state's Fourth Cycle (2012-2016) of Regional Water Planning.

The Region H area includes all or part of the following counties: Austin, Brazoria, Chambers, Fort Bend, Galveston, Harris, Leon, Liberty, Madison, Montgomery, Polk, San Jacinto, Trinity, Walker, and Waller.

Copies of the grant application may be obtained from SJRA when it becomes available or online at www.regionhwater.org. Written comments from the public regarding the grant application must be submitted to SJRA and TWDB prior to TWDB Board action on this application. Comments must be received by May 4, 2011, and can be submitted as follows:

Reed Eichelberger, General Manager
San Jacinto River Authority
P. O. Box 329
Conroe, Texas 77305-0329

Melanie Callahan
Interim Executive Administrator
Texas Water Development Board
P. O. Box 13231
Austin, Texas 78711-3231

FILED FOR
RECORD
2011 MAR 28 PM 1 07
Angie Steuber
COUNTY CLERK
SAN JACINTO COUNTY, TEXAS

For additional information please contact Jace Houston, Deputy General Manager, SJRA, at 936-588-7111 or Glenda Callaway, RHWPG consultant, at 713-520-9031 or info@regionhwater.org.

RE: Request for Legal Ad

DATE: 25 March 2011

Set out below is a legal notice with two parts that the Region H Water Planning Group wants to place in your newspaper for one day, Thursday, March 31, 2011. We also will need a Publisher's Affidavit and tear-sheet as soon as possible. We must include those with our grant application to the Texas Water Development Board.

Please advise me by phone (713-520-9031) or by e-mail (glencall@aol.com) if you can place the notice on the date indicated below and the cost of placement. E-mail is the preferred form of communication.

Newspaper and date of publication: **Brazosport Facts, Thursday, March 31, 2011**

If you are able to place the ad on the date requested, please do so and bill to:

Ekistics Corporation
P. O. Box 6234
Kingwood, Texas 77325-6234

PLEASE NOTE THAT THIS IS A NEW MAILING ADDRESS. Thanks for your help in expediting this request. Please call if you have questions.

COMBINED NOTICE OF FINDING OF NO SIGNIFICANT IMPACT AND INTENT TO REQUEST RELEASE OF FUNDS

March 31, 2011
City of College Station
1101 Texas Avenue
College Station, TX 77840
(979) 764-3778

This Notice shall satisfy the above-cited two separate but related procedural notification requirements.

REQUEST FOR RELEASE OF FUNDS

On or about April 15, 2011 the City of College Station will submit a request to HUD for the release of Community Development Block Grant program funds under Title I, Section 104(h) of the Housing and Community Development Act of 1974, as amended, to undertake a project known as George K. Fitch Park Improvements, for the purpose of building a new lighted concrete walking/jogging loop, with trees to the immediate north-east of current park playground equipment.

FINDING OF NO SIGNIFICANT IMPACT

The City of College Station has determined that the project will have no significant impact on the human environment. Therefore, an Environmental Impact Statement under the National Environmental Policy Act of 1969 (NEPA) is not required. Additional project information is contained in the Environmental Review Record (ERR) on file at the City of College Station Community Development office, 1207 Texas Avenue, College Station, Texas 77840, and may be examined or copied weekdays 8 A.M. to 6:30 P.M.

PUBLIC COMMENTS

Any individual, group, or agency disagreeing with this determination or wishing to comment on the project may submit written comments to the City of College Station Community Development office. All comments received by April 15, 2011 will be considered by the City of College Station prior to authorizing submission of a request for release of funds. Commentors should specify which part of this Notice they are addressing.

RELEASE OF FUNDS

The City of College Station certifies to HUD that David Neeley, in his capacity as City Manager, consents to accept the jurisdiction of the Federal Courts if an action is brought to enforce responsibilities in relation to the environmental review process and that these responsibilities have been satisfied. HUD's approval of the certification satisfies its responsibilities under NEPA and related laws and authorities, and allows the City of College Station to use Program funds.

OBJECTIONS TO RELEASE OF FUNDS

HUD will consider objections to its release of funds and the City of College Station's certification received by April 15, 2011 or a period of fifteen days from its receipt of the request (whichever is later) only if they are on one of the following bases: (a) the certification was not executed by the Certifying Officer or other officer of the City of College Station approved by HUD; (b) the City of College Station has omitted a step or failed to make a decision or finding required by HUD regulations at 24 CFR Part 58; (c) the grant recipient or other participants in the project have committed funds or incurred costs not authorized by 24 CFR Part 58 before approval of a release of funds by HUD; or (d) another Federal agency acting pursuant to 40 CFR Part 1504 has submitted a written finding that the project is unsatisfactory from the standpoint of environmental quality. Objections must be prepared and submitted in accordance with the required procedures (24 CFR Part 58) and shall be addressed to HUD grant administration office at 1301 Fannin Street, Suite 2200, Houston, TX 77002. Potential objectors should contact HUD to verify the actual last day of the objection period.

David Neeley, City Manager
3-31-11

NOTICE TO PUBLIC

Regional Water Planning
NOTICE DATE: March 31, 2011

RE: Request for Legal Ad

DATE: 24 March 2011

Set out below is a legal notice with two parts that the Region H Water Planning Group wants to place in your newspaper for one day, Wednesday, March 30, 2011. We also will need a Publisher's Affidavit and tear-sheet as soon as possible. We must include those with our grant application to the Texas Water Development Board.

Please advise me by phone (713-520-9031) or by e-mail (glencall@aol.com) if you can place the notice on the date indicated below and the cost of placement. E-mail is the preferred form of communication.

Newspaper and date of publication: **Liberty Vindicator, Wednesday, March 30, 2011**

If you are able to place the ad on the date requested, please do so and bill to:

Ekistics Corporation
P. O. Box 6234
Kingwood, Texas 77325-6234

PLEASE NOTE THAT THIS IS A NEW MAILING ADDRESS. Thanks for your help in expediting this request. Please call if you have questions.

BEGINNING OF AD ***

**NOTICE TO PUBLIC
Regional Water Planning
NOTICE DATE: March 31, 2011**

Notice is hereby given that the San Jacinto River Authority (SJRA) will submit by 5 pm on April 8, 2011, a grant application for financial assistance to the Texas Water Development Board (TWDB) on behalf of the Region H Water Planning Group (Region H), to carry out planning activities to develop the 2016 Region H Water Plan as part of the state's Fourth Cycle (2012-2016) of Regional Water Planning.

The Region H area includes all or part of the following counties: Austin, Brazoria, Chambers, Fort Bend, Galveston, Harris, Leon, Liberty, Madison, Montgomery, Polk, San Jacinto, Trinity, Walker, and Waller.

Copies of the grant application may be obtained from SJRA when it becomes available or online at www.regionhwater.org. Written comments from the public

regarding the grant application must be submitted to SJRA and TWDB prior to TWDB Board action on this application. Comments must be received by May 4, 2011, and can be submitted as follows:

Reed Eichelberger, General Manager
San Jacinto River Authority
P. O. Box 329
Conroe, Texas 77305-0329

Melanie Callahan
Interim Executive Administrator
Texas Water Development Board
P. O. Box 13231
Austin, Texas 78711-3231

For additional information please contact Jace Houston, Deputy General Manager, SJRA, at 936-588-7111 or Glenda Callaway, RHWPG consultant, at 713-520-9031 or info@regionhwater.org.

NOTICE OF PUBLIC MEETING
Regional Water Planning
Notice Date: March 31, 2011

Notice is hereby given that the Region H Water Planning Group (RHWPG) is seeking input from the public on the scope of planning activities to be considered during the Fourth Cycle of Regional Water Planning.

The Public Meeting will be held in conjunction with the upcoming regular RHWPG meeting, to be held at the offices of the San Jacinto River Authority, 1577 Dam Site Road, Conroe, Texas 77305, **May 4, 2011 at 10:00 a.m.** Written and oral comments (not to exceed five (5) minutes per speaker) regarding the scope of activities to be considered during the Fourth Cycle of Regional Water Planning will be accepted at this meeting. Written comments may be mailed, emailed or faxed and will be accepted as part of the record if received by 10 a.m. on May 4, 2011. Comments may be mailed to:

Hon. Mark Evans, Chair, RHWPG
c/o San Jacinto River Authority
P. O. Box 329
Conroe, Texas 77305

Comments may be emailed to the RHWPG website at www.regionhwater.org, or faxed in care of SJRA at 936-588-3043.

The Region H area includes all or part of the following counties: Austin, Brazoria, Chambers, Fort Bend, Galveston, Harris, Leon, Liberty, Madison, Montgomery, Polk, San Jacinto, Trinity, Walker, and Waller.

A copy of the current 2011 Regional Water Plan is available on the RHWPG website at

www.regionhwater.org or on the Texas Water Development Board site at <http://www.twdb.state.tx.us/wrpi/rwp/3rdround/2011RWP.asp>.

If you have questions or need additional information, please contact Jace Houston, Deputy General Manager, SJRA, at 936-588-7111, or Glenda Callaway, RHWPG consultant, at 713-520-9031, or by email at info@regionhwater.org.

From: classifieds@madisonvillemeteor.com
To: Glencall@aol.com
What is the billing address for this legal?

Thanks

Sandie

On 3/28/11 10:59 AM, "Glencall@aol.com" <Glencall@aol.com> wrote:

Thanks, Sandie. It all looks great except for what looks to be an added space after the Region H website address is the first part of the notice (I think it's the third paragraph), and two missing periods after the website addresses in the last paragraph. None are fatal flaws. Please let me know the cost and run the ad on March 31, 2011.

I will be out of the office from noon-four p.m. today, but will have my cell with me. Call at either 713-520-9031 or 713-705-1174 if there are questions. Thanks. Glenda

Ms. Callaway,

I apologize for not getting back with you sooner! We have scheduled to run your two legal notices in the Polk County Enterprise, San Jacinto News-Times and Trinity Standard for March 31, 2011. The cost of placement is \$465.30. We will send an invoice along with tear sheet and publisher's affidavit to the address provided after publication and as quickly as possible!

Thank you and have a great day,

RE: Request for Legal Ad
DATE: 24 March 2011

Set out below is a legal notice with two parts that the Region H Water Planning Group wants to place in your newspaper for one day, Thursday, March 31, 2011. We also will need a Publisher's Affidavit and tear-sheet as soon as possible. We must include those with our grant application to the Texas Water Development Board.

Please advise me by phone (713-520-9031) or by e-mail (_glencall@aol.com) (<mailto:glencall@aol.com>) if you can place the notice on the date indicated below and the cost of placement. E-mail is the preferred form of communication.

Newspapers and date of publication:

Polk County Enterprise, Thursday, March 31, 2011
San Jacinto News Time, Thursday, March 31, 2011
Trinity Standard, Thursday, March 31, 2011

If you are able to place the ad on the date requested, please do so and bill to:

Ekistics Corporation
P. O. Box 6234
Kingwood, Texas 77325-6234

PLEASE NOTE THAT THIS IS A NEW MAILING ADDRESS. Thanks for your help in expediting this request. Please call if you have questions.

Date: 3/25/2011 2:47:53 P.M. Central Daylight Time
From: scurr@hcnonline.com
To: Glencall@aol.com

In the paper it is running all together straight up & down. The proof is split so it fits on one 8x11 sheet of paper.

Subject: Re: Proof of Your Ad 00EKLG (see Attachment)

Susan - I have reviewed the proof and think it is OK if the ad is running in one column. If it is split to two columns side by side, then the second heading (Notice of Public Meeting) should not be separated from the remainder of that heading.

If it is possible to add a line space before the last ...if you have question or need additional information... that would read better.

Otherwise, please run on March 31, 2011 at a cost of \$218.58. Thanks for your help. Glenda

Glenda

Attached is your proof. It is schedule to run in the Waller County News Citizen 03/31/11. The total net cost is \$218.58. Please call or email changes by Monday 1pm or the ad will run as submitted.

Thank you

Susan

**NOTICE TO PUBLIC
Regional Water Planning
NOTICE DATE: March 31, 2011**

Notice is hereby given that the San Jacinto River Authority (SJRA) will submit by 5 pm on April 8, 2011, a grant application for financial assistance to the Texas Water Development Board (TWDB) on behalf of the Region H Water Planning Group (Region H), to carry out planning activities to develop the 2016 Region H Water Plan as part of the state's Fourth Cycle (2012-2016) of Regional Water Planning.

The Region H area includes all or part of the following counties: Austin, Brazoria, Chambers, Fort Bend, Galveston, Harris, Leon, Liberty, Madison, Montgomery, Polk, San Jacinto, Trinity, Walker, and Waller.

Copies of the grant application may be obtained from SJRA when it becomes available or online at www.regionhwater.org. Written comments from the public regarding the grant application must be submitted to SJRA and TWDB prior to TWDB Board action on this application. Comments must be received by May 4, 2011, and can be submitted as follows:

Reed Eichelberger, General Manager
San Jacinto River Authority
P. O. Box 329
Conroe, Texas 77305-0329

Melanie Callahan
Interim Executive Administrator
Texas Water Development Board
P. O. Box 13231
Austin, Texas 78711-3231

For additional information please contact Jace Houston, Deputy General Manager, SJRA, at 936-588-7111 or Glenda Callaway, RHWPG consultant, at 713-520-9031 or info@regionhwater.org.

NOTICE OF PUBLIC MEETING

**Regional Water Planning
Notice Date: March 31, 2011**

Notice is hereby given that the Region H Water Planning Group (RHWPG) is seeking input from the public on the scope of planning activities to be considered during the Fourth Cycle of Regional Water Planning.

The Public Meeting will be held in conjunction with the upcoming regular RHWPG meeting, to be held at the offices of the San Jacinto River Authority, 1577 Dam Site Road, Conroe, Texas 77305, **May 4, 2011 at 10:00 a.m.** Written and oral comments (not to exceed five (5) minutes per speaker) regarding the scope of activities to be considered during the Fourth Cycle of Regional Water Planning will be accepted at this meeting. Written comments may be mailed, emailed or faxed and will be accepted as part of the record if received by 10 a.m. on May 4, 2011. Comments may be mailed to:

Hon. Mark Evans, Chair, RHWPG
c/o San Jacinto River Authority
P. O. Box 329
Conroe, Texas 77305

Comments may be emailed to the RHWPG website at www.regionhwater.org, or faxed in care of SJRA at 936-588-3043.

The Region H area includes all or part of the following counties: Austin, Brazoria, Chambers, Fort Bend, Galveston, Harris, Leon, Liberty, Madison, Montgomery, Polk, San Jacinto, Trinity, Walker, and Waller.

A copy of the current 2011 Regional Water Plan is available on the RHWPG website at www.regionhwater.org or on the Texas Water Development Board site at <http://www.twdb.state.tx.us/wrpi/rwp/3rdround/2011RWP.asp>. If you have questions or need additional information, please contact Jace Houston, Deputy General Manager, SJRA, at 936-588-7111, or Glenda Callaway, RHWPG consultant, at 713-520-9031, or by email at info@regionhwater.org.
